- 2 - L-Wrench 7/64 (Used to remove barrel mount laser from long gun)
- 1 - Vibra Tite VC-3 Thread Locker (For securing Battery End Cap)

Battery Replacement Instructions

1. Using a dime (or flat blade screwdriver) unscrew Battery End Cap.
2. Remove old batteries and discard.
3. Insert two new #377 batteries, negative side first. Test laser with a StressVest prior to Step 4 to ensure batteries are installed correctly.
4. Put a **small** dab of Vibra Tite VC-3 on the threads of Battery End Cap to prevent loosening over time. *Note: DO NOT over apply. See diagram below for reference on amount.*
5. Thread Battery End Cap back on and tighten with a dime (or flat blade screwdriver) until snug.
